---

Karen,

It is my understanding that DEQ is having conversations with Sultzer, Cascade General, and Schnitzer regarding the possibility of expanded stormwater sampling at their respective sites (whole water and sediment traps). Although the LWG has been working with EPA and DEQ to develop the scope of this stormwater sampling effort, we have not resolved who will collect or pay for this effort. As we discussed today, there are also concurrent settlement discussions going on amongst numerous parties, the LWG, and EPA regarding the in-water AOC. If you or anyone else at DEQ is asked by non-LWG parties about "who" will collect, analyze, and pay for these samples, or about access agreements to collect these samples, please refer them to Patty Dost.

Thanks,

Jim McKenna
